

Targeted Tutoring

An early literacy tutoring solution for students in the **Louisiana REAL** program

[Register here!](#)

Targeted Tutoring is an academic support solution designed to reinforce student learning with **tailored instruction** in both 1-on-1 and group learning environments.

PreK through grade 3 students have access to a pipeline of trained, professional reading tutors during and outside of school hours through scheduled, reoccurring tutoring sessions. All tutors are certified and specialize in reading.

1-on-1 Student/Tutor Sessions

Tutoring sessions can have 1:1 tutor/student ratios. **Parents can also join sessions** their child to see the tutoring process in real time.

Optimal Group Learning Environments for Young Learners

Additional reading tutor assistants are assigned to group sessions to lead **focused breakout sessions** and ensure student questions get answered.

Size of Class

Time

Tracking Student Progress

Testing and assessments support an adaptive approach.

Continual assessment of tutors and students allow us to set the baseline to assign students to the right tutoring session. Then, iterative testing allows us to understand student comprehension before, during, and post tutoring sessions.

At the end of a tutoring session, there will also be a final assessment to help evaluate the overall impact of the tutoring program.
